DETAILED ACTION

Status of Claims

1. In response filed March 06, 2006, the applicants amended claims 12 and 13. No claims have been cancelled and new claims 14 and 15 have been introduced. Claims 1-15 are currently pending.

Response to Arguments

2. Applicant's arguments, see page 18, filed March 06, 2006, with respect to Fig 2 have been fully considered and are persuasive. The objection of Fig 2 has been withdrawn.

3. The Examiner appreciates the applicants' suggestion to consult with SPE about the applicants' arguments before sending out this office action and have done so. Applicant's arguments, see page 18-19, filed March 06, 2006, with respect to the rejection(s) of claim(s) 12 and 13 under U.S.C. § 112 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S.C. §112 second paragraph regarding claims 12 and 13.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 12 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 12 and 13, the applicants amended the claims to state an apparatus comprising: "an output; and a processing unit connected to said output and programmed to:"

From the currently presented claim language it is unclear as to how an output can exist as any part of the makeup of an apparatus. An apparatus is defined as an integrated group of materials or devices used for a particular purpose; however, an output is not a material or a device and is simply a result of a process. Therefore, an output cannot be an apparatus.

It is also unclear whether the above said output is the same or performs the same function as "output the portion of the total costs for each of the entities based on the accumulated result for each of the entities." as directed by the limitations of claims 12 and 13.

Below is the previous office action for reference and prosecution record purposes.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12 and 13 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 12 and 13 are written in "single means claim" format since they recite only one element to do all the functions recited. The claim is not written in "means-plus-function" language, however, in *Fiers v. Revel*, (CAFC) 25 USPQ2d 1601, 1606 (1/19/1993, the CAFC affirmed a rejection under 35 USC 112 of a claim reciting a single element that did not literally use "means-plus-function" language. Claims 12 and 13 are drawn to any "Underwriter", regardless of construct, that performs the function recited. This parallels the fact situation in *Fiers* wherein "a DNA" and a result was recited. The CAFC stated in *Fiers* at 1606 "Claiming all DNA's that achieve a result without defining what means will do so is not in compliance with the description requirement; it is an attempt to preempt the future before it has arrived". See also *Ex parte Maizel*, (BdPatApp&Int) 27 USPQ2d 1662, 1665 and *Ex parte Kung*, (BdPatApp&Int) 17 USPQ2d 1545, 1547 (1/30/1989) where the claims at issue were rejected for being analogous to single means claims even though "means" was not literally used. Thus, claims 12 and 13 yield an "Underwriter" that achieves a result without defining what will do so.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

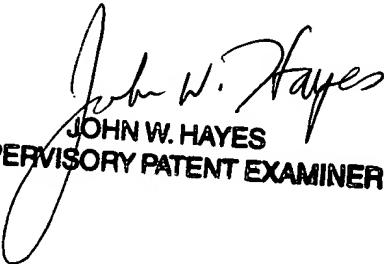

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
